Frankfurt am Main/Copenhagen, September 22, 2008

Stora Enso chooses dynamic SAP services from T-Systems

T-Systems dynamically operates SAP systems for Stora Enso worldwide, providing a Dynamic Services for SAP Solution encompassing payment of IT resources based purely on demand and utilization. Technical and human resources are scaled up and down in line with business development, and are charged on a pay-as-you-go basis. This will allow the company to flexibly adjust its computing power and data storage to the development of business needs at 72 locations in 23 countries.

The unique SAP solution enables the demand-driven use of SAP and dynamically adapts ICT capacities like computing resources and data storage to Stora Enso's business processes, boosting efficiency and reducing costs. T-Systems is the only service provider to offer the "Dynamic Services for SAP Applications" solution. With this solution, companies can use SAP services flexibly based on their actual requirements.

Stora Enso will then have the opportunity to receive and pay for only those data center resources that we actually use. Fees are based on the number of SAPS and DB size, the extent of use and the usage duration. This means that capacities can be flexibly adjusted to business needs while the costs for SAP operation are significantly lowered, investment risks are minimized and resource planning is improved for Stora Enso.

Stora Enso has more than 20,000 SAP users worldwide. At peak times, over 2,000 employees access the system simultaneously per day. The central SAP application

covers more than 170 business processes, ranging from finance and payroll to materials management, through to human resources management.

About Stora Enso

Stora Enso is an integrated paper, packaging and forest products company producing newsprint, magazine paper, fine paper, consumer board, industrial packaging and wood products. Stora Enso's sales totalled EUR 11.8 billion in 2007. The Group has some 36,000 employees in more than 40 countries on five continents. Stora Enso has an annual production capacity of 13.1 million tonnes of paper and board and 7.5 million cubic metres of sawn wood products. Stora Enso's shares are listed in Helsinki and Stockholm.

About T-Systems

T-Systems is Deutsche Telekom's enterprise customer unit. More than 160,000 corporations and public institutions use the provider's network-centric information and communications technology (ICT) services – ranging from data center operations and global services based on the Internet Protocol, to the development and management of applications. With locations in over 20 countries, T-Systems is a preferred supplier for Corporate Europe's global business activities. The company, based in Frankfurt/Main, Germany, serves all industries and is a leading provider for the automotive and telecommunications industries as well as the public sector. With approximately 56,500 employees, T-Systems posted revenue of 12 billion Euros in 2007.
